A rural scene featuring a wooden barn in the background, a mailbox in the foreground, and a circular text overlay. The mailbox is mounted on a wooden post and has the text "LA POSTE" and "FRANCO" visible. The barn is made of light-colored wood and has a dark roof. The scene is set in a grassy area with trees in the background.

The concept

“As long as there are huts in the woods, nothing is completely lost...”
S.Tesson

We have created a peaceful haven in the countryside, far from any noise or visual nuisance, so that families, friends or colleagues can get together and share convivial, authentic and relaxed moments.

In a preserved environment, in the middle of the Perche hills, we hope that our guests will gradually relax and let go. "It is becoming urgent to take time" is the credo of the Country Lodge. Straddling the border between a gîte and a hotel, we want our guests to feel at home in the countryside: turn off the phone, have lunch on the terrace in the sun, take a nap in the grass, light a fire, play with the family, contemplate nature, let the children go away, listen to the birds, come into contact with the animals...

Within this new framework, we have several objectives:

To re-establish contact with the fauna and flora, especially among the youngest.

To discover the Perche region through cultural visits, walks, sports or creative activities and meetings with local producers.

To share our passion for the countryside by giving easy access to families and city businesses.

To propose a "digital detox": to take time to breathe, to admire and to really find yourself.
